# Overview

Dear user of our P'oloc Playz website, this guide will help you through the basic use of our video platform.

It allows you to create your very own personal playlist composed of videos not only from a single video hosting site but from many.

Our main providers of videos are Youtube, DailyMotion and Vimeo, all of which are contacted via their own API, allowing you to make a cross-search across those 3 big sites and retrieve a list of the most relevant videos originating from several video platforms at a time!

You can add, organize and play videos on your playlist from any source directly on our website, as each player is used for their respective platform.

# Use cases

## 1. Register

First things first, you need to create an account in order to use the full potential of our site! By registering, you enable yourself to create your own playlist of videos from either Youtube, DailyMotion or Vimeo.

Sign Up

Login

In order to register, press the “Sign in” button in the top right corner of the Home P’oloc Playz page and type in your email along with a password of choice. If you provided a proper email and password, your account will be successfully created!

## 2. Log in

Now that you have registered an account with your email, you can now use that email & password combination to safely Log into our website, once you are logged in you can access full website functionality and keep your data linked to your profile!

Once you are logged in, instead of seeing the “Sign up” and “Login” buttons, you see the logout button instead.

### 3. Search for a video

When you are on the home P'oloc Playz page, whether you are logged in or not, you are able to search for videos from the search bar at the top of the page, the list of videos resulting from that search are then displayed on a grid along with information related to each video.

### 4. Add a video to playlist

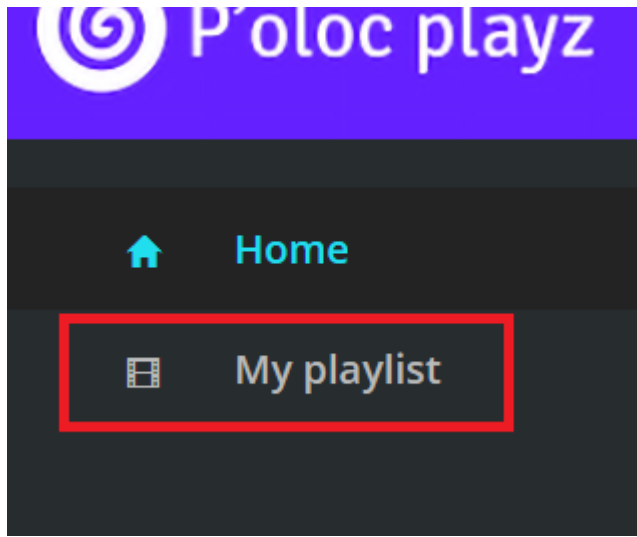

If you happen to be logged in before doing a search with keywords, you will have the option to add the video results to your playlist via the “Add playlist button” that will be displayed on the bottom right corner of the video thumbnail.

The videos added this way will then be available on the “My playlist” page.

### 5. Watch a video from your playlist

Once logged in, the button to access the “My playlist” page will be displayed on the sidebar under the “Home” button as shown below:

Once on the “My playlist” page, you’ll be shown a top down list of the videos you added to your playlist.

Select one of these videos to be displayed comfortably in big format on the left of the list with some important related info. The player used here won’t be a popup player this time and it will directly be integrated in the page.

## 6. Remove a video from your playlist

If you have grown tired of one of the videos in your playlist, you always have the option to remove it from said playlist via the “Delete from playlist” button, it looks like this:

It won’t be listed in your “My playlist” anymore after you delete it, even though you can still add it back if you wish to do so by searching for the video again on “Home”

## 7. Logout

When you've had enough of seeing and modifying your own playlist, you can log out of your account by clicking the logout button in the top-right corner of the page as shown below:

Note that if you happen to log out of your account while on the “My playlist” page, you will automatically be redirected to the home page where you’ll only be able to search for videos without the option to add them to your playlist.
